Fourteen-year-old Louise Stella flees into the forest to escape an intruder who would take her hostage. But by the time she returns to her house, her country has broken out in war and her home island has become a military base. Sharing the land with enemy soldiers, Louise's only goal is to stay alive one day at a time. Having no food or water, and little knowledge of how to survive in the forests of Quebec, her biggest adversary is "the Unknown". Her pride crumbles and she realizes that she can't sustain herself. She must depend on someone else... but Who? Isolated is a Young Adult suspense novella with uncertainty lurking at every turn. It will have you asking the big questions about life and death. Will you come to the same conclusion as Louise?
