### Book Synopsis:

Luke Truman is a junior officer on board the USS *Leviathan*, the most advanced and powerful warship ever built. It is an eight-hundred-foot-long submarine which, among its vast array of weaponry and secret systems, boasts a top secret “cloaking technology.” Bending light around objects to render them invisible, it is the hottest military research innovation not just in the US, but throughout the world. Now the time has come for the first large-scale trial of its effectiveness. But neither Luke nor the United States government realize the astonishing forces this experiment will unleash. What Luke discovers on board the *Leviathan* is that the future of our world is at a deadly tipping point and that only he will be able to stop the cascade of events which are leading them all inexorably towards doom.
