Book Synopsis:

A single kiss could change both their lives forever, but it's not his kiss to take...Dr. Evan Harrison has become a recluse, a prisoner inside his own house, felled in his prime by a migraine headache without end. All he'd ever wanted was to be a doctor, and now he's nothing - until chance delivers a beaten and battered Jamie into his care. Fourteen years his junior, gorgeous, mouthy, stubborn and...completely and unquestionably straight. Maybe. Or maybe not...Jamie doesn't know what hit him, other than there were three of them, and that he's broken and in pain and he doesn't know the identity of the kind stranger with the cold stethoscope and warm eyes taking care of him. And he sure as hell doesn't know why he likes his bossiness or finds him sexy....Chance may have brought them together, but a shared attraction keeps them together long after Jamie's bruises have faded. As Evan enjoys the longest pain-free stretch he's known in two years, they begin to explore their attraction, the caresses of a kind Jamie's never known. But even as Evan revels in his young lover's first, tentative touches, the guilt is never far from his mind. Jamie's never looked at another man romantically and Evan's never looked at anything but. And Jamie won't kiss him. That would be... gay. Evan wants Jamie's kiss more than he's ever wanted anything before in his life, but it's not his kiss to take, it's Jamie's to give. Evan knows wanting Jamie is wrong, their relationship unethical, a relationship forbidden with just cause. He swore an oath to do no harm. And it's not only his oaths that are going to get broken--he's never given his heart away before...
